

# SERPENTINE BELT KITS

Engineered to deliver complete, hassle-free repair for your accessory drive system.

Designed with premium OE-quality materials, this kit offers a long-lasting solution for both technicians and customers with components designed to work seamlessly together, Cloyes Kits ensure a reliable, worry-free installation – right out of the box.

## Why Choose Cloyes Kits?

**Quieter Operation** - Reduces noise and vibration especially during cold starts or accessory engagement.

**Controlled Engagement** - Fabric backing helps manage slip and tension changes, ideal for systems with A/C cycling/rapid load shifts.

**Superior Wear Protection** - Reinforced outer layer minimizes abrasion from back-side pulley contact and rough edges.

**Better Heat Management** - Dissipates heat more evenly across the belt surface, reducing hot spots that can lead to cracking or glazing.

**OE Fit, Form, Function** - Built for long-term performance and backed by legendary quality and service of over 100 years.

## What's in the Kit?

**Highest Quality Tensioners** - Engineered for smooth operation and reduced wear.

**High-Strength Pulleys** - Minimize vibration, extend system life, and ensure proper belt alignment.

**Premium Fabric-backed EPDM Belt**, designed to withstand the harsh conditions of high-mileage engines, tight routing, and daily driving.

**Belt Routing Guide** - Engine-specific belt routing guide for accurate installation.

Cloyes, based in Fort Smith, Ark., is the North American leader and global designer, developer, manufacturer, and distributor of timing drive systems and components for original equipment manufacturers and the automotive aftermarket. Its products are mission critical components for engine performance and function and are used in high-performance and replacement applications. Cloyes serves a broad customer base, including wholesale distributors, national and local retailers, re-packagers, and production engine rebuilders, and sells its products under the Cloyes® brand worldwide and the Dynagear® and CY-LENT® brands throughout North America.

## Tensioners

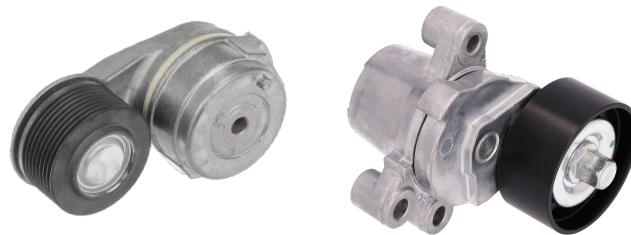

**Cloyes belt tensioners are built for reliability, precision, and long-lasting performance.**

Engineered with premium materials and precision-machined components, they ensure smooth engine operation while minimizing wear and preventing costly failures. Designed to meet or exceed OE specifications, Cloyes tensioners provide the perfect fit and lasting durability you can depend on.

### DID YOU KNOW?

Fact message... At 90,000 miles your tensioner has performed over 10 million times.

### Key Features and Benefits:

- **Consistent, Reliable Tension:** Designed to maintain proper belt tension, reducing wear and maximizing efficiency across all driving conditions.
- **High-Durability Spring Technology:** Available in both round and flat spring types, made from fatigue-resistant steel for stability and longevity.
- **Corrosion & Water Resistance Protection:** Electrophoretic surface treatment and PA46 nylon damping sleeve shield against rust and harsh conditions.
- **Advanced Bearing System:** Enhanced dust and moisture resistance for extended service life
- **OE Fit & Performance:** Engineered to match original specifications for seamless installation and optimal performance.
- **Hassle-Free Installation:** Designed for quick, precise, and frustration-free installs.
- **Industry-leading Warranty & Support:** dedicated technical support to ensure hassle-free installation and performance.

## Pulleys

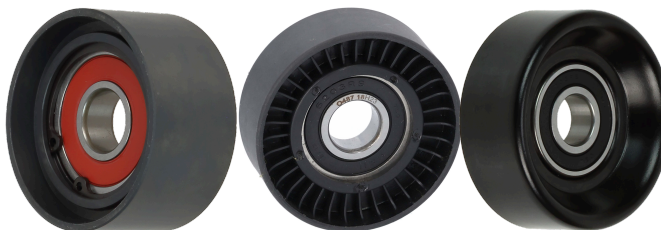

**Cloyes pulleys are engineered for smooth, reliable belt operation in even the toughest conditions.**

Designed with OE-level precision, high-durability materials, and advanced corrosion resistance, they help maintain optimal belt alignment, minimize vibrations, and extend the life of the entire system. Built to meet or exceed OE specifications, Cloyes pulleys ensure a perfect fit and long-lasting performance you can trust.

### DID YOU KNOW?

Belt drive system components wear out at the same rate. Inspect at 60,000 miles and replace at 90,000 miles.

### Key Features and Benefits:

- **High-Quality Construction:** Made from high-strength steel or reinforced polymer (application-specific) for maximum durability.
- **Triple-Sealed Bearing System:** Protects against dust, dirt, and moisture to extend service life.
- **Corrosion-Resistant Coating:** Electrophoretic treatment prevents rust and degradation in harsh conditions.
- **Optimized Balance for Vibration Control:** Reduces noise and extends belt and accessory lifespan.
- **OE Fit & Performance:** Precision-machined to match original manufacturer specifications for a perfect fit.
- **Hassle-Free Installation:** Designed for quick, precise, and frustration-free installs.
- **Industry-leading Warranty & Support:** dedicated technical support to ensure hassle-free installation and performance.

## Fabric-Backed Belts

**Engineered for the Real World. Trusted by Professionals. Cloyes fabric-backed belts are built with performance and longevity in mind.**

Cloyes premium fabric-backed EPDM belt is designed to withstand the harsh conditions of high-mileage engines, tight routing, and daily driving. When the job calls for quiet operation, long life, and professional reliability — this is the belt you want.

### PREMIUM FABRIC-BACKED BELT

- 1 Fabric-Backed Top:** Maintains grip and tension under extreme conditions
- 2 Tension Cord + Cushion:** Resists heat build-up, cracking & glazing
- 3 Ribbed Base:** Reduces noise and vibration

### Key Features and Benefits:

- **Quieter Operation:** Dampens noise and vibration common in aging or misaligned systems, especially during cold starts or accessory engagement.
- **Controlled Engagement:** Fabric backing helps manage slip and tension changes. ideal for systems with A/C cycling or rapid load shifts.
- **Superior Wear Protection:** Reinforced outer layer minimizes abrasion from back-side pulley contact and rough edges.
- **Better Heat Management:** Spreads and dissipates heat more evenly across the belt surface, reducing hot spots that can lead to cracking or glazing.
- **Ideal for Older Engines:** Compensates for imperfect pulley alignment and worn components making it a smart choice for retrofits, rebuilds, and high-mileage repairs.
- **OE Fit, Form & Function & Limited Lifetime Warranty:** Backed by a century-long reputation offering unmatched repair confidence in every component.
