

# Accessory Drive Belt Tensioner B20573HP

**Cloyes Performance Belt Tensioners are built with precision, strength, and durability to ensure your entire accessory drive runs smoother, lasts longer, and withstands the elevated forces of high-RPMs.**

From a precision-machined pulley with premium protective coatings to upgraded bearings, damping enhancements, and reinforced structural components, this high-performance tensioner provides the reliability and control builders and tuners depend on.

## Key Features and Benefits:

- Upgraded precision machined pulley delivers smoother, more consistent rotation and improved belt tracking, reducing slip and maintaining accessory efficiency at high RPM.
  - Premium protective e-coating improves corrosion resistance and shields the pulley against harsh under-hood conditions, ensuring long-term reliability.
  - Enhanced bearing design increases load capacity and durability, allowing the system to handle extreme forces from boosted, high-RPM, or performance-built engines.
  - Improved damping reduces vibration, minimizes arm movement, and enhances belt stability, extending the overall lifespan of the tensioner.
  - With strengthened structural components and reinforced bracket integrity improves system rigidity and ensures consistent tension control.
- 
- Critical components feature upgraded surface protection, reducing friction and wear to deliver smoother operation and longer service life.
  - Every enhancement works together to provide reliable tension control, smoother accessory operation, and improved drive stability in demanding performance environments.
  - Direct bolt-on compatibility with OE geometry makes installation quick and precise while delivering significantly improved durability and control over stock components.

Cloyes, based in Fort Smith, Ark., is the North American leader and global designer, developer, manufacturer, and distributor of timing drive systems and components for original equipment manufacturers and the automotive aftermarket. Its products are mission critical components for engine performance and function and are used in high-performance and replacement applications. Cloyes serves a broad customer base, including wholesale distributors, national and local retailers, re-packagers, and production engine rebuilders, and sells its products under the Cloyes® brand worldwide and the Dynagear® and CY-LENT® brands throughout North America.
